

## PC Performance Tip: Make Your Windows 8 Start Faster

Is your Windows 8 computer a bit slow on startup? Don't worry - it's really easy to speed things up. All you need to do is stop programs you don't need from starting up every time Windows boots.

Here is how to do it on Windows 8:

1. Press CLTR+SHIFT+ESC to open the Task Manager
2. Click on More Details and go to the Startup tab
3. Highlight the program you want to stop launching on startup and click on the Disable button

See, it couldn't be any easier!
